

Cochlear Implants

– a New Sense of Hearing

The movie deals with questions concerning cochlear implants and makes it easier for you to get into the subject. Among other things, you get to study the procedure of diagnosis, surgery, the cochlear implant being tuned in, and habilitation as well as meet children and adults with connections to cochlear implants.

The picture-book allows you to follow the family from the first meeting with the doctors, diagnosis and surgery to the tuning in of the processor. The picture-book focuses on children and is richly illustrated with pictures. It may well be used in a preschool or by the family when preparing siblings or the child that is getting a cochlear implant.
